Reference Services

IF IT EXISTS, WE HAVE IT.

Our Reference Staff can:

- Help you search our catalog and online journals and databases;
- Get you materials we don't have access to through interlibrary loan;
- Create bibliographies on your desired subject.

Contact the Reference Desk at

Library.Reference@noaa.gov for more information.

IF WE DON'T, WE'LL FIND IT.

Citation Management

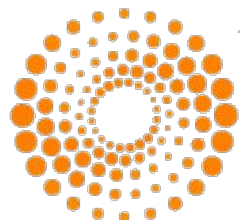

Collect, manage, and share your research sources with a citation management tool.

- Use online or download to your desktop.
- Add notes to collected resources.
- Build bibliographies in a large variety of styles.

ENDNOTE® **zotero**

Citation Management

WEB OF SCIENCESM

THOMSON REUTERS

+

ENDNOTE[®]

- NOAA staff on the Silver Spring campus have access to the Web of Science database core collection which works seamlessly with EndNote web and desktop versions.

- EndNote X8 desktop version available for download for NOAA staff at the [NOAA Google Site EndNote page](#)

Author ID

What is it?

- It's a unique identifier - like a DOI for people.

Why do I want one?

- It helps people find your work - and credit it properly.
- It helps you track your publications

Where do I get one?

 **Jamie
Roberts**

Welcome to ResearcherID Labs!

ResearcherID invites you to explore the ResearcherID Labs environment, an area designed to display visualizations of each member's collaborators and on those papers citing a researcher's work.

These tools allow for analysis of research networks based on:

- research areas
- country/territory
- institution
- author name
- publication year
- geographic location.

Additionally, you can create a ResearcherID badge for display on your webpage or blog.

Every member of ResearcherID has a Labs page. Availability of features is dependent on a researcher's privacy settings. Explore the Labs by clicking menu items on the left.

DOI

NCL offers DOI minting for NOAA Publications

- A unique identifier makes it easier for users to cite your work and for you to track those citations.
- DOIs provide a persistent link to your publication- if the publication is moved, the DOI link will work
- NOTE: Journal articles are assigned DOIs by the journal publisher

Institutional Repository (IR)

Submit your publications and articles for inclusion in the IR!

- Make your publication more accessible to other users and the general public.
- Now accepting NOAA pubs and journal articles published Oct. 2015 to present.
- Use the [NOAA IR Submission Form](#) or email noaa.repository@noaa.gov

The screenshot shows the NOAA Institutional Repository website. At the top is the NOAA logo and the text "National Oceanic and Atmospheric Administration, United States Department of Commerce". Below this is a navigation bar with links: Home, Collections, Authors, Recent Additions, and About NOAA Inst. Repos. A search bar is prominently displayed with the text "Search the NOAA Institutional Repository" and a dropdown menu for "All Collections". A large featured article titled "California Drought : 2014 Assessment" is shown, along with a "Featured Article" section. The "In the Spotlight" section highlights "Emergency Preparedness & Management" with a list of resources. The "Recently Added" section lists new publications, and the "Most Popular" section lists popular items. The "Featured Collection" section highlights the "National Environmental Policy Act (NEPA)".

Citation Analysis

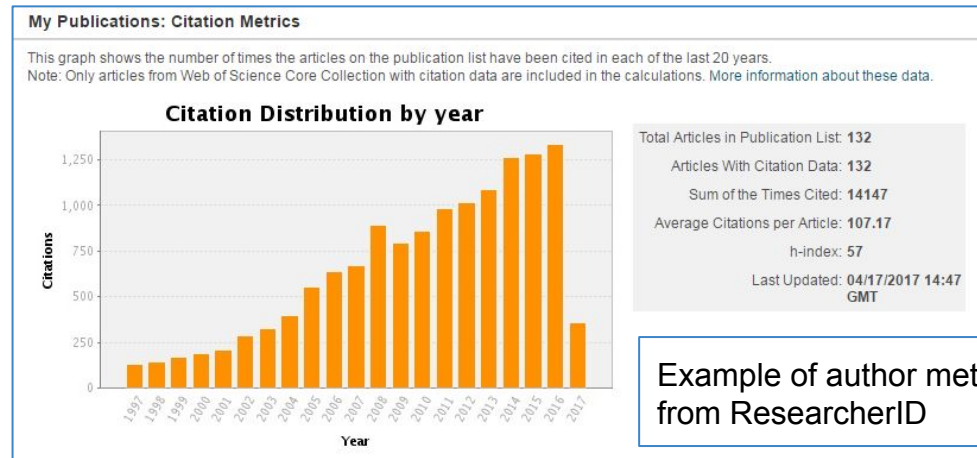

Showcase the value and reach of your published research through Bibliometrics. Use h-index, citation counts, percentile rankings, and more to demonstrate the impact of your work or your research group.

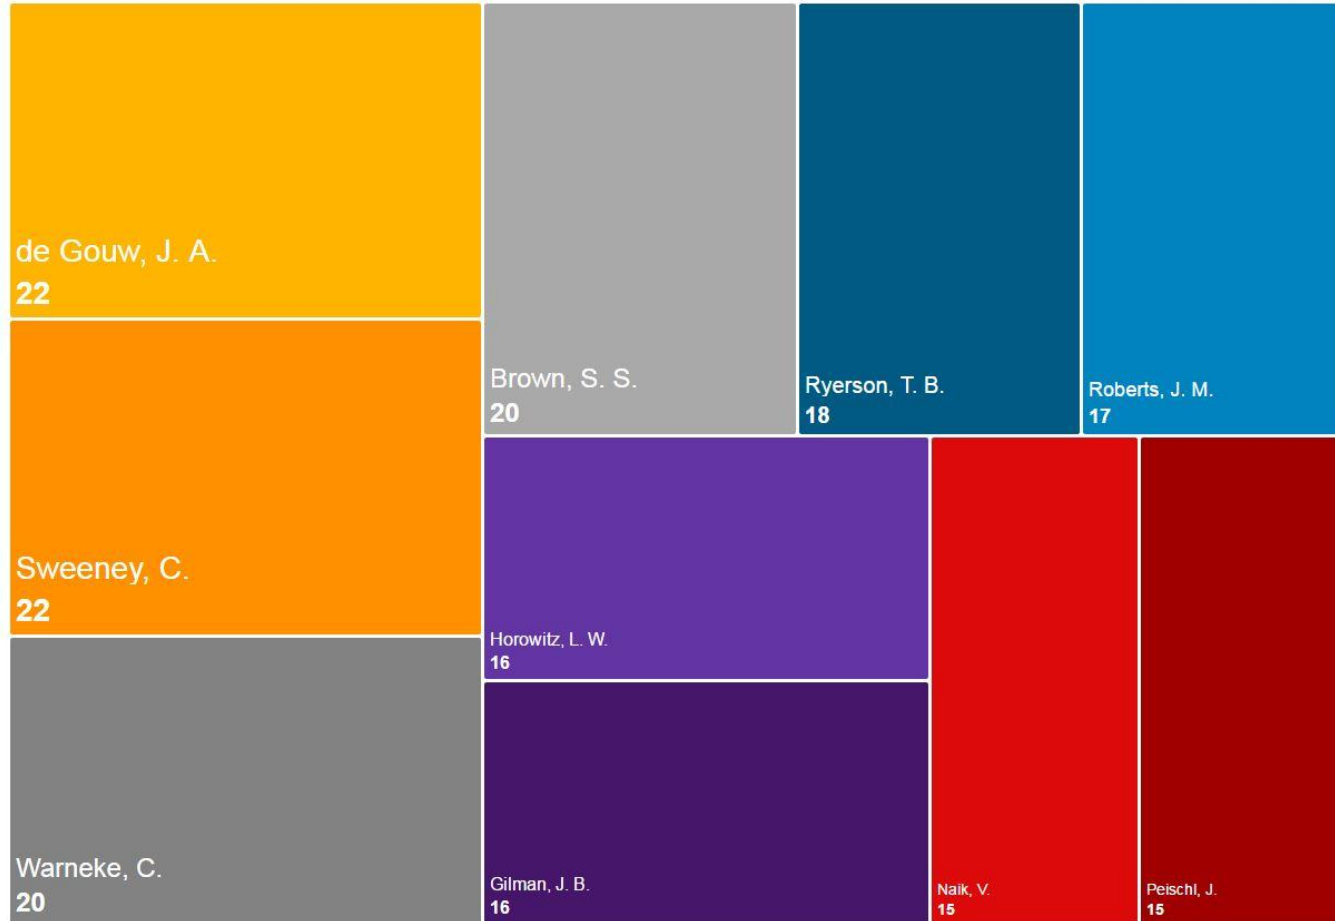

Do it yourself with the tools in:

- Web of Science
- InCites
- ResearcherID and ORCiD
- Google Scholar

... or ask us for help.

InCites

National Oceanic and Atmospheric Administration

<https://incites.thomsonreuters.com>

Citation Analysis

More uses of bibliometrics:

- Explore trends in research to identify emerging areas of research and potential bibliography sources;
- Identify top researchers and funding agencies to locate potential collaborators and grant sources;
- Evaluate suitability and desirability of journals before submitting articles for publication.
